DETAILED ACTION

This application was filed 11/19/2003 and is a Con of 09/424257 (3/21/2000, now US Patent #6,680,282) which is a 371 of PCT/JP98/02434 (6/2/1998) which claims priority to JP 144266/97 filed 6/2/1997. Claims 1-2 have been canceled. Claims 3-32 are before the Examiner.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims are ambiguous due to each of the claims having formula I within them. But the metes and bounds of each "formula I" are different from each of the other "formula I"s. Which formula I is the correct formula I. Each claim can be of formula I wherein the different R groups are smaller in scope from the main definition of formula I. However, in the instant claims, the different R groups have different and sometimes overlapping definitions. This creates ambiguous claims. Correction is required.

Allowable Subject Matter

3. Claims 3-32 are free of prior art. The closest art is Oku (US Patent #5,994,368) which teaches similar quinoline compounds. However, the use is different and the moieties that substitute the quinoline compound are different.
